

REACH Compliance Declaration February 2022

To whom it may concern,

Thank you again for inquiring about Eaton's ethical, social and environmental standard practices of sustainability. We are very proud of our efforts and are glad that your company is also committed to these practices. Eaton is fully committed to meet all regulatory requirements applicable to its products and carefully monitors new- and upcoming legislation that could affect Eaton and its products. Eaton has taken the necessary steps for implementing these product requirements in a timely manner.

The European Chemical Agency (ECHA) updates the Candidate List, which is part of the EU-REACH-Regulation EC1907/2006. Eaton monitors all updates closely and has established processes to identify whether any of the 223 Substances of Very High Concern are contained in our products and we are actively working with our suppliers concerning this matter, consistent with Eaton's commitment to our customers.

As we trust you appreciate, our efforts remain in progress as suppliers respond with more relevant and complete information. In accordance with article 33.1 of the EU-REACH declaration, we would like to inform you that Eaton brass products containing SVHCs above the threshold of 0.1 mass percent per article are listed on our website (<https://www.eaton.com/us/en-us/products/productstewardship.html>), but the verification process via suppliers and/or testing continues. As suppliers provide more information on the same, we will update this list regularly. Part numbers listed below (column Other Raxton Codes & Other Redapt Codes).

To our best current knowledge, we have no information available that any other of the currently listed SVHC is contained above 0.1 mass percent in the products attached to this declaration. Part numbers listed below (column Other Raxton Codes & Other Redapt Codes).

However, should above mentioned status change or we retrieve information from our suppliers that any other SVHC above 0.1 mass percent is contained in products supplied to you, then we will inform you according to the requirements as outlined in the article 33.1 of the REACH regulation.

This declaration is based on information available to us. It refers to the products at the date of issue. We make no express or implied representations or warranties with respect to the information contained herein.
