performance

Slurry & dredge pumps in the Aggregates Industry

Spiral classifier overflow – HM250

Screen underflow – MR200

Clarifier underflow

Metso's slurry pumps are heavy and robust centrifugal pumps, capable of handling tough and abrasive duties. Designed for excellent performance, low energy consumption, long wear life and easy maintenance.

We also offer engineering consultation and state-of-the-art pump sizing and selection software.

Various designs are available to cover all hydraulic transportation needs in the widest variety of process applications including grinding circuits, tailings disposal, filter feed, dredging, hydro cyclone feed and general slurry transfer.

We are the OEM with original drawings and design details for the following brands: Metso, Svedala, Denver, Sala, Orion and Thomas.

Dredge pump

Hydrocyclone tower – HR

Spiral classifier overflow – VS200

Metso has many years of experience supplying all types of crushing, screening, classification, separation, dewatering, conveying and pumping equipment to the aggregate industry. To support your slurry transport needs Metso has a wide range of heavy-duty slurry pumps in both horizontal and vertical configurations. Pumps built from high chrome white iron hard metal castings are ideal for transporting large particle slurries. Rubber lined pumps are available for handling the finer particle slurries to obtain long operating life. Metso also has the expertise to support technical and field support needs as well as replacement part requirements.

Washer underflow – HR300
