

## SPLASH GUARD

# Added Protection in An Easy to Use Design

*Eaton engineering solution for safety and convenience*

- Easy to install on FLOWLINE™ and FLOWLINE II™ filter vessels
- Protects operators from accidental pressurized vessel discharge
- Reduces operator exposure to potentially hazardous material
- Provides additional eye and face protection

A broken or misplaced seal, a spike in line pressure, or the failure to fully relieve system pressure before servicing the vessel can result in a potentially dangerous and costly spray.

With Splash Guard properly installed, escaping fluids are directed downward, away from the surrounding area. This keeps the spray away from operating personnel and away from the face and eyes.

# EATON

*Powering Business Worldwide*

## FLOWLINE

- Most cost effective solution to single bag vessel requirements.
- Rated at 150psi at 250°F for high performance at economical pricing.
- Unique internal body to basket seal to prevent bypass.
- FLOWLINE style cover design provides safe and reliable “no tools required” access for bag replacement.
- Displacement style cover prevents spills when opening the cover

## FLOWLINE II

- Same basic design of the FLOWLINE with the added feature of a unique one-piece body design that eliminates the traditional body to bottom cap circumferential weld.

## FLOWLINE and FLOWLINE II can be configured into MODULINE™ assemblies

- Higher efficiency & operation cost savings
- Modular flexibility for adding capacity
- Smaller footprint than duplexed multibag housings
- Continuous flow capability
- Capital cost savings of 30% to 40% or more

## Filter Bags

### Progaf

Absolute rated with up to 15 layers of media

### Accugaf

Absolute rated at 99%

### Lofclear

Oil removal and gels

### Hayflow

Up to 5 times the life of standard bags

### Durgaf

Up to 3 times the life of standard bags

### Sentinel

High quality, durable performance

### Unibag

Efficiency with an economical advantage
